ABOUT TAXIECO

Founded in April 2020, TAXIECO New World Limited is a rapidly growing technology innovator based in Hong Kong, transforming the transportation and logistics sectors with advanced IoT solutions and data-driven platforms.

Current Market Focus:

Today, Taxieco concentrates on providing comprehensive smart logistics infrastructure throughout the Asia-Pacific region. This encompasses deploying advanced AIoT dispatch platforms for optimized routing, implementing blockchain technology for immutable shipment tracking and security, and developing Environmental, Social, and Governance (ESG)-driven solutions. Our focus is on enabling efficient, transparent, and sustainable logistics operations for businesses across the region.

Initial Focus:

From our inception, Taxieco's unwavering commitment has been to deliver safe and sustainable mobility solutions. Our core mission involved transforming traditional fleet operators by strategically integrating cutting-edge technologies like Artificial Intelligence (AI) and the Internet of Things (IoT) directly into their transportation operations. This digital foundation aimed to enhance efficiency, safety, and environmental performance right from the start, setting the stage for our evolution.

Agreement for Regional Expansion

Taxieco plans to strategically leverage the Regional Comprehensive Economic Partnership (RCEP) agreement to fuel our regional expansion. This landmark pact facilitates streamlined cross-border trade and supply chain integration across member nations. By utilizing RCEP's provisions, we aim to simplify logistics, reduce friction in international shipments, and enhance connectivity throughout the Asia-Pacific market we serve.

Business Strategy Revision

Taxieco is revising its strategy to actively pursue alliances with global capital partners, including investors from Taiwan and the US. A key component of this revised strategy is securing a public market listing. This financial evolution is designed to provide the substantial resources needed to dramatically accelerate our regional expansion and technology deployment plans.

Regional Collaboration Approach

Our approach to regional collaboration centers on co-investing with strong local partners, exemplified by our JV with TEXTS in the Philippines. This model effectively combines Taxieco's advanced technology platforms with the indispensable regional operational expertise, market access, and cultural understanding of our local partners for mutual success and accelerated growth.

LONG-TERM GOAL IN ASIA

Our long-term vision is to fundamentally transform Asia's supply chain landscape. We aim to achieve this by deploying a fully integrated, smart logistics ecosystem regionally. This ecosystem will enable seamless, digitalized trade – moving towards truly borderless and paperless transactions – across all ASEAN nations and other RCEP member countries, fostering unprecedented efficiency and integration.

PRIMARY GEOGRAPHIC FOCUS

Taxieco's primary geographic focus is firmly on Southeast Asia. We have established active operations and partnerships in key markets including Hong Kong, the Philippines, Malaysia, followed by Vietnam, Thailand, and Indonesia. This region represents a high-growth area with significant demand for the smart logistics infrastructure solutions we provide.

RCEP Significance:

The RCEP agreement holds immense significance for Taxieco. Its provisions for significant tariff reductions, simplified customs procedures, and the establishment of modern digital trade rules directly support our mission. This framework dramatically boosts intra-Asia supply chain integration, reduces operational complexities, and creates a more favourable environment for our cross-border smart logistics solutions.

Hong Kong Ride-Hailing Challenge:

The principal challenge Taxieco faces concerning the Hong Kong ride-hailing market is the persistent regulatory uncertainty surrounding new mobility platforms. This is compounded by fierce and organized opposition from traditional taxi operators, creating a highly volatile and restrictive environment that hinders sustainable market entry and growth for non-traditional players.

Prioritized Market Type:

Taxieco strategically prioritizes the Business-to-Business (B2B) logistics market over consumer ride-hailing services. Our core focus is on providing smart infrastructure and digital solutions for corporate supply chains, offering stability and scalability, rather than engaging in the volatile and regulatory-challenged consumer ride-hailing sector.

Industry Leadership Goal:

Taxieco aims to achieve leadership across Asia within the smart logistics industry. We intend to secure this position by pioneering and deploying cutting-edge innovations, particularly in Artificial Intelligence (AI) and blockchain technology, to revolutionize how logistics and supply chains operate throughout the region, setting new standards for efficiency and intelligence.

Current Market Focus

Today, Taxieco concentrates on providing comprehensive smart logistics infrastructure throughout the Asia-Pacific region. This encompasses deploying advanced AIoT dispatch platforms for optimized routing, implementing blockchain technology for immutable shipment tracking and security, and developing Environmental, Social, and Governance (ESG)-driven solutions. Our focus is on enabling efficient, transparent, and sustainable logistics operations for businesses across the region.
